SUMMARY

Python/Django developer with 2+ years of experience building scalable backend systems across e-commerce, government, civic engagement, IMS, CMS and healthcare platforms. Skilled in DRF, PostgreSQL, Celery/Redis, payment gateways, WebSockets, WebRTC and multi-tenant architecture. Proficient in Agile development, Pytest and Unit Testing to deliver reliable, maintainable code. Maintained production systems for government platforms, national election infrastructure and high-traffic news portals.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, C/C++

Backend Development: Django, Django REST Framework, Basic FastAPI, REST APIs, WebSockets

Frontend Development: Next.js, HTML, CSS, Tailwind CSS, Bootstrap

Database Management: PostgreSQL, MySQL, SQLite

DevOps & Cloud: Docker, CI/CD Pipelines, AWS, Git, Vercel

Tools & Technologies: LaTeX, Postman, Swagger/OpenAPI, JWT, OAuth

PROFESSIONAL EXPERIENCE

Python / Django Developer

Jan 2026 – Present

Prixa Technologies, Kuponhole, Lalitpur

Sarkari Projects – [Inland Revenue Department](#), [Department of Information Technology](#) & similar

- Maintain and enhance core functionality across multiple government multi-tenant systems, resolving production bugs with minimal downtime.
- Own the Government Integrated Website Management System for Nagarpalika, Ward and Department levels – building custom drag and drop templates and shipping fixes across live municipal deployments including [Rapti Sonari Gaunpalika](#).

Election – [Election Nepal 2082](#)

- Deliver and maintain key modules, scraping and integrating official government data with Celery-automated scheduled fetching to keep national election infrastructure accurate and up to date.
- Integrated embedded iframes across 5+ live news portals with distinct themes and ad-management configurations.

Hospital Management System – [National Cardiac Centre](#)

- Added features to streamline patient records, appointments and administrative workflows on a comprehensive hospital management platform.

Digital Petition Platform – [Speakup Nepal](#)

- Built a multi-tenant petition and civic-engagement platform with user interaction features.

Online News and Articles – [Ukaalo](#)

- Built and maintain an online news portal for publishing digital content, including a WebSocket-based role-based chat system for content moderators and editors.

News Portals – [Annapurna Post](#), [Lokantar](#) & similar

- Maintain 8+ high-traffic, scalable news portal systems with content management and publication features.
- Led database migration from MySQL to PostgreSQL, ensuring seamless data transfer, schema compatibility and zero data loss.

IMS – [Neo Appliances](#)

- Delivered a scalable inventory management system.

Backend Developer

Jun 2025 – Dec 2025

Bichitras Group Pvt. Ltd., Rastrapati Marg, Lalitpur

Socio E-commerce Platform – [Nepolive](#) ([Apps on Google Play](#))

- Built core e-commerce features (products, cart, checkout), integrated Stripe, PayPal, eSewa and Khalti, and developed reels with like, comment and bookmark features.
- Implemented social login and gamified reward modules with notifications, using Celery with RabbitMQ for scalable background task processing in a microservices architecture.

Rental / House Booking Application – [Niwasly](#)

- Added availability calendars, search functionality and reservation tracking.
- Implemented live chat and notifications using WebSockets to boost user interaction and engagement.

Mental Health & Communication Platform

- Built a secure authentication system with login, signup and social logins (Facebook, Google) plus full admin functionalities.
- Developed real-time chat and audio calling using WebSockets and WebRTC, with auto session timeout and smooth message handling.

Travel & Adventure Booking Website – [Nature Nuts Travel and Tours](#)

- Delivered a dynamic travel booking website with a full-featured admin panel and smooth user experience.

Backend Developer Intern

Mar 2025 – May 2025

Bichitras Group Pvt. Ltd., Rastrapati Marg, Lalitpur

- Built product listing, shopping cart and order handling modules for an e-commerce platform.
- Engineered a WebSocket-based real-time chat system to facilitate instant user communication.
- Built an attendance system with check-in/check-out functionality to track user activity.

PROJECTS

Stock Price Prediction System

[\[GitHub\]](#)

- Developed ML powered forecasting platform using Django with gradient descent optimization for improved prediction accuracy.
- Engineered RESTful APIs enabling real-time data retrieval and forecast generation from historical market data.

Movie Ticket Booking System

[\[GitHub\]](#)

- Built full-stack booking application with seat selection interface and secure payment simulation.

Netflix-Style Streaming Platform

[\[GitHub\]](#)

- Architected video streaming platform with JWT authentication, personalized watchlists and optimized content delivery.

Social Media Microblogging Platform

[\[GitHub\]](#)

- Developed real-time tweet application with CRUD operations and user authentication.

E-Commerce Platform

[\[Live Link\]](#)

- Launched production-ready e-commerce website with payment gateway integration and inventory management.

EDUCATION

Bachelor in Computer Science and Information Technology (BSc CSIT)

2021 – 2025

Asian School of Management and Technology

+2 Science

2018 – 2020

Goldengate International College
